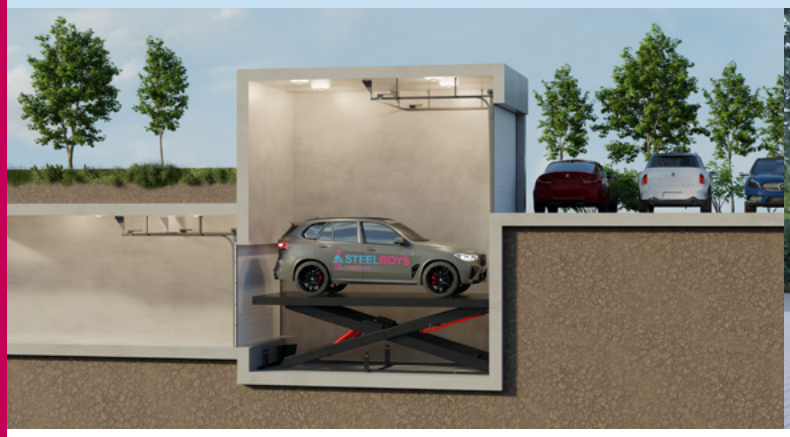
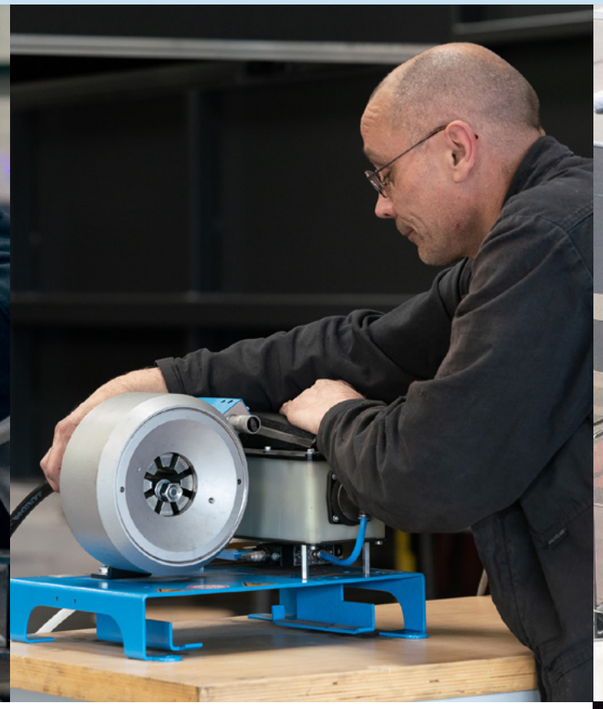
Hydraulic scissor car lifts



www.steelboys.nl



WE ARE STEELBOYS

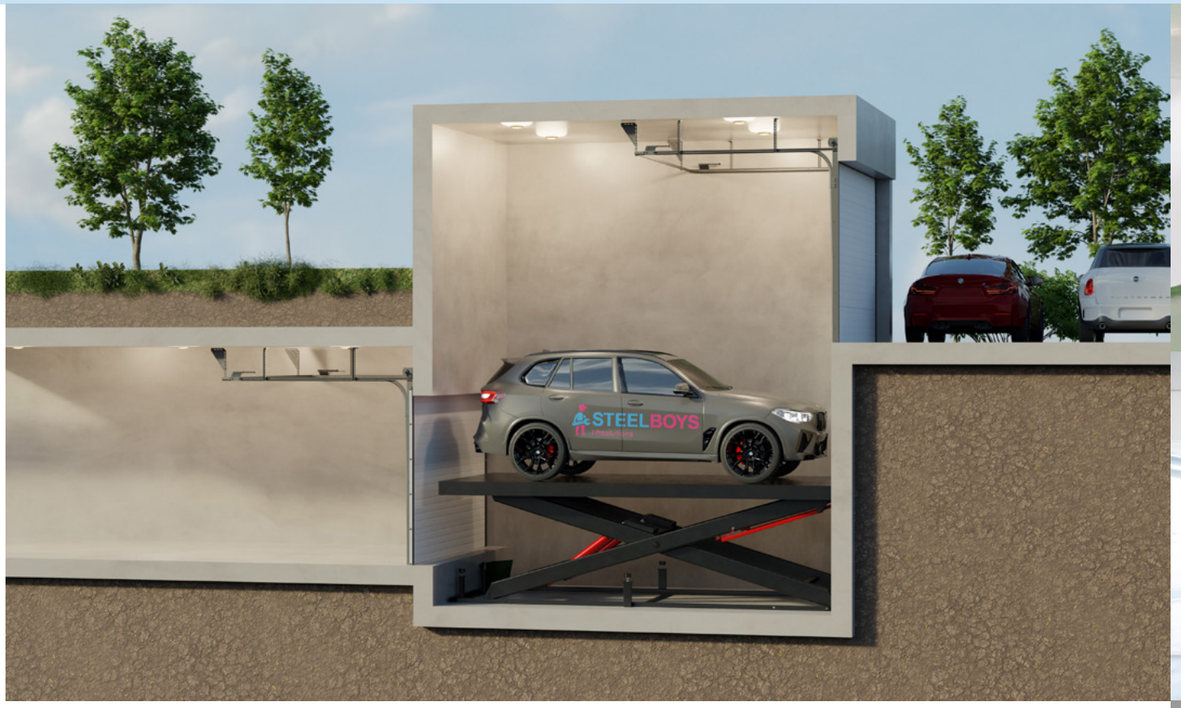
an experienced manufacturer of hydraulic scissor car lifts

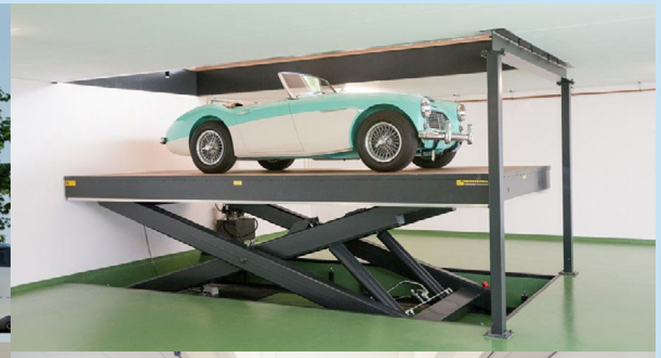
In our modern production area located in the Netherlands we produce scissor car lifts from raw steel to finished product. All lifts are custom designed and manufactured by us. Through knowledge and experience we produce solid liftsolutions which we successfully deploy in the European market. Steelboys has an extensive dealer network that sells our lifts and provides service and maintenance. We would like to get in touch with you and refer you to the right dealer in your area.

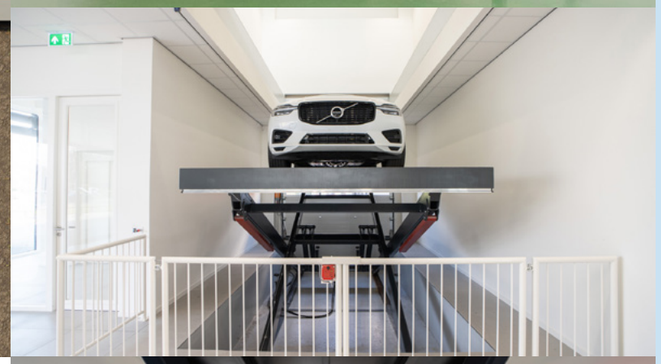
Are you a specialized lift company and are you looking for a reliable manufacturer of scissor lifts, then we like to get in touch with you to realize beautiful projects together.

EXTENSIVE NETWORK OF DEALERS

Steelboys car lifts are sold exclusively by professional lift companies. This is necessary to guarantee a correct assembly and professional service. Of course, the dealer can fall back on the extensive knowledge and skill of the Steelboys technicians. The daily service and maintenance of your installation will be done by your carefully selected dealer. By using high quality parts, you are assured of a reliable lift system for years!







CLX-SMART

car lift with no passengers allowed

Steelboys' reliable hydraulic scissor lifts safely and effectively bridge any level. The car lifts are equipped with optimal safety features and are custom made. This means that a customized solution is always possible. The CLX-SMART is a car lifts where passengers are not allowed to travel with the carlift.

Specifications

General

Drive system	Electro hydraulic
Lifting capacity	2.500 to 5.000 kg
Lifting speed	Variable: approx. 55 mm/sec. optional to max. 100 mm/sec.
Lifting height	to 5.000 mm

Platform

Platform width	2.500 to 3.000 mm
Platform length	5.000 to 7.500 mm
Floor finish	Flat plate or checker plate

Construction pit

Pit depth	650 to 800 mm
Pit width	Platform width + 60 mm
Pit length	Platform length + 60 mm
Color	Standard in RAL 7021 (black grey), other colors on request

Electricity and motor

Power Supply	3 x 400 V + N - 50 Hz
Engine power	Depending on lifting capacity and speed

Different dimensions and lifting capacity on request.

Anti-creep system possible

When choosing the anti-creep option, 4 pins are provided at the end of the platform. At the moment the lift arrives at the floor, the pins are sent out and the lift mechanically deposits in the structural facilities.

Necessary preparations

- Constructive pit at lowest level
- Separate machineroom for hydraulic unit and control cabinet
- Connection from pit to machine room, for hydraulic hose
- Safety features tailored to your situation (ask about the possibilities)
- 400 V 3 phase power connection. The fuse will be known after engineering of the lift

Flexible sizing, suitable for any project

All our car lifts are custom made. Ask our advisors about the possibilities!

CLX-FLEX

the car lift with roof that disappears invisibly into the floor

Car lift type CLX-FLEX is a perfect solution to transport your cars invisibly to the basement. At the moment you arrive, you request the lift by means of the coded remote control. Then the lift rises and you can drive the car onto the lift. You get out of the car and send the lift to the basement. There the door opens automatically and you can drive out the car. The roof construction seals the opening above watertight and your cars are safe and dry in the basement car park.

Specifications

General

Drive system	Electro hydraulic
Lifting capacity	to 3.000 kg
Lifting speed	Variable: approx. 55 mm/sec. optional to max. 100 mm/sec.
Lifting height	to 5.000 mm

CLX-MIX

the car lift where passengers may remain seated in the car

This car lift is a perfect solution where cars are parked under the residential complex. You request the lift and the entrance door opens automatically. Then you drive the car into the lift and go down by pushing the button with constant pressure. There the door opens and you can drive into the basement car park.

Specifications

General

Drive system	Electro hydraulic
Lifting capacity	2.500 to 5.000 kg
Lifting speed	Variable: approx. 55 mm/sec. optional to max. 150 mm/sec.
Lifting height	to 5.000 mm

Platform

Platform width	2.500 to 3.000 mm
Platform length	5.000 to 7.500 mm
Floor finish	Flat plate or checker plate

CLX-FLEX MIX

car lift with roof construction where passengers are allowed

The CLX-FLEX MIX car lift is an ideal parking solution in your driveway, where people can remain seated in the car. The lift disappears invisibly into the pavement and can be called by remote control. The solid roof construction can be driven over by cars and ensures a safe closure. Optimal safety is ensured by walls and light frame protections. Steelboys car lifts can be supplied with a galvanized gutter construction to create a watertight seal.

Necessary preparations

- Constructive pit at lowest level
- Separate machineroom for hydraulic unit and control cabinet
- Connection from pit to machine room, for hydraulic hose
- Safety features tailored to your situation (ask about the possibilities)
- 400 V 3 phase power connection. The fuse will be known after engineering of the lift
